

Appendix C: Email Parsing Methodology

Emails present on this device are stored in 2 ways:

- Heirarchichal directory storage in “/mobile/Library/Mail/<Mailbox>/<folder>/”
- In a Data Structure with two correlated SQLite databases: Envelope Index and Protected Index; located at “/mobile/Library/Mail/”

Emails stored in the second way were parsed using the following methodology:

Table 7-3: Email Parsing Correlation						
Database Name	Table Name	Key Column 1	Key Column 2	Key Column 3	Key Column 4	Key Column 5
Envelope Index	Mailboxes	ROWID	url (folder name within an email id)			
	Messages	mailbox	-	ROWID		
	Message_data			Message_id	ROWID	
Protected Index	Messages			Message_id		
	Message_data				M_data_id	data

The fields circled together are the ones on which values are matched to create the correlation between data in all the tables.

Be careful! We have enough problems as it is, we can't be getting in trouble or losing our jobs. Nothing special has turned up here, but I am still keeping an eye out. We usually start to host some interesting events this time of the year, I'm sure something will pop up.

I was told that we are supposed to be receiving a rare collection of
stamps. That would explain why the shipping information looked a bit out
of the ordinary to me. I'm not certain of the specifics for the stamps, but
they seem to be very highly valued by somebody. Maybe this is our ticket.
